

OER Accessibility Series: Captioning and Transcripts

Captioning and transcripts are text alternatives for audio-based content. There are a couple of important things to keep in mind about captioning and transcripts:

- A transcript is a document with all of the audio typed out on it from a media file; captions are transcripts that have been timed and coded into video files.
- Because accessibility laws call for an equivalent experience, transcripts are not enough for video content—there must be timed captions.
- It's also important to make sure that your captions and transcripts are equally as understandable and readable as your audio. So as you edit, add in punctuation and capitalization to help with clarity and remove unnecessary “ums” and “uhs.”
- For copyright-protected videos or podcasts for which you have permission to include in your course, you should first check to see if they already have captions and/or transcripts. If they do not, work with the copyright holder to create them.
- Many universities have their own video hosting and captioning tools. It is recommended to use those university-supported tools, and to get help with them, you should contact your university information technology support team. This tutorial will provide free alternatives to your university supported tools.

Captioning Videos with YouTube

YouTube has an auto-captioning function that is activated when new videos are uploaded. Those auto-captions are probably about 80% accurate, but it gives you a place to start so that you don't have to caption your whole video from scratch. YouTube also has a very easy-to-use caption editing function that you can then use to clean up those auto captions.

1. Make sure you are logged into your Google account. Upload your video to YouTube by clicking the small add video icon, then click "Upload video."

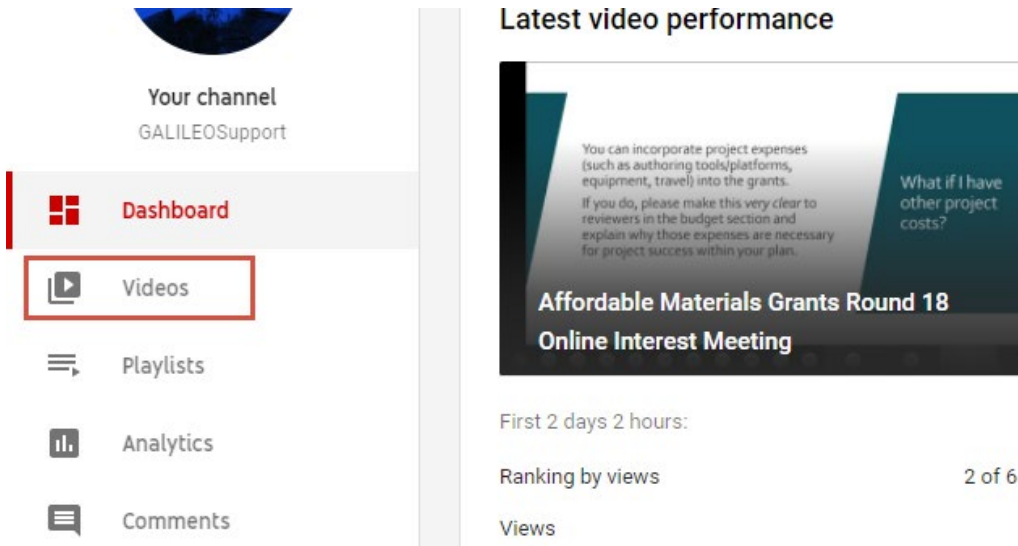

2. Drag and drop your video file into the box provided to upload it. When the video is finished uploading, go through the video settings to finish the upload.
3. If you're not automatically taken to YouTube Studio, click your image in the top right corner, then "YouTube Studio."

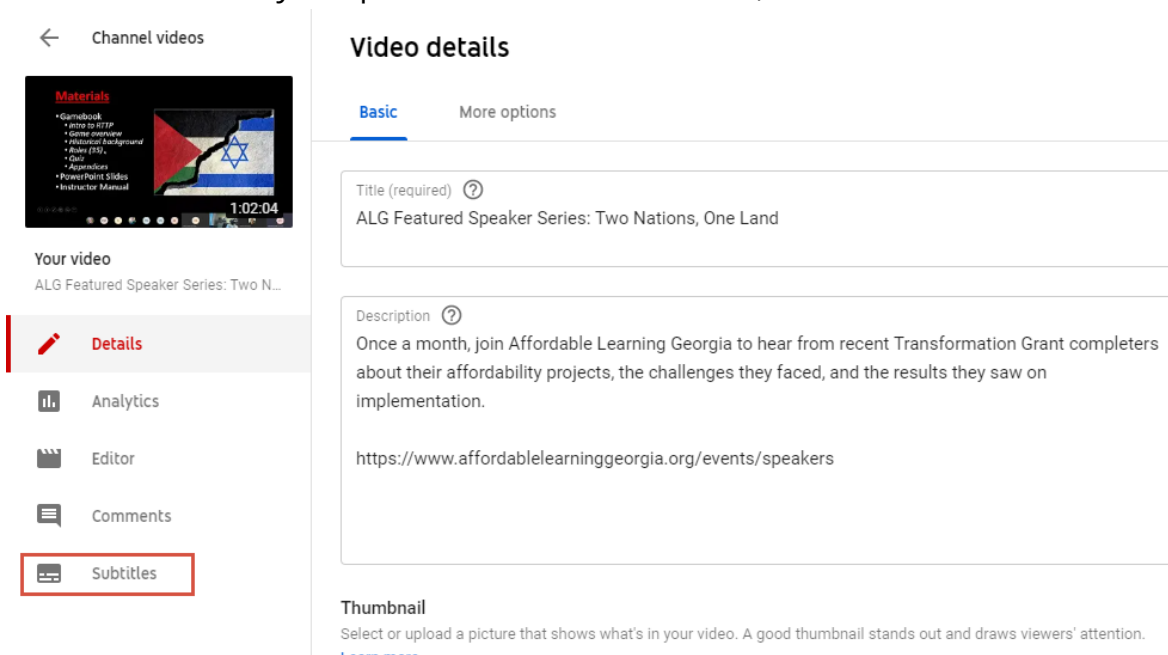

4. Give your video at least a couple of hours to process its auto-captions. When a "cc" button appears on your video in the bottom right corner, continue to the next step.

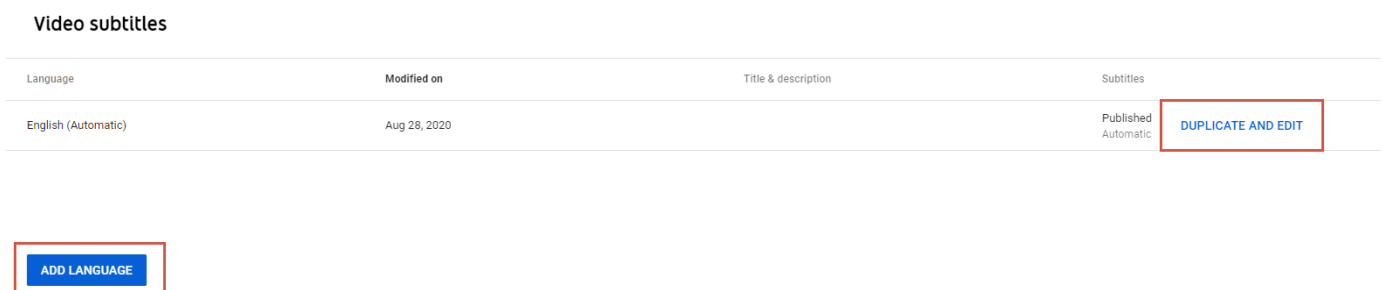

5. From YouTube Studio, click “Videos.”

6. Click on the video you uploaded. In the editor view, click “Subtitles.”

7. You should have automatic English captions on your video, if you gave it enough time to process. Click “Duplicate and Edit” on the automatic captions. Note: If your video is in a foreign language or you want to add more languages to your captions, you need to click “ADD LANGUAGE” and select your language.

8. The YouTube editor should give you your auto-generated captions to start with. Check the “Pause while typing” box below the video.

The screenshot shows the YouTube video editor interface. At the top right, there are buttons for 'SAVE DRAFT' and 'PUBLISH'. The main area is divided into two sections: a caption editor on the left and a video player on the right. The caption editor has a list of captions with timecodes. The video player shows a video titled 'Featured Speaker Series: Two Nations, One Land' with a 'Pause while typing' checkbox checked and highlighted by a red box.

9. If you click the play button on the video, the video will start playing. You can edit your captions as you watch, and each time you start to type, the video will automatically pause until you are finished. Edit your captions as needed, clicking “Save Draft” periodically as you go.

The screenshot shows the YouTube video editor interface. At the top right, there are buttons for 'SAVE DRAFT' and 'PUBLISH'. The main area is divided into two sections: a caption editor on the left and a video player on the right. The video player is playing, and the 'SAVE DRAFT' button is highlighted by a red box.

10. When you are finished, click “Publish.”

Transcribing Audio with Otter

Otter is an audio transcription tool with a free option that allows you to transcribe up to 600 minutes per month. The tool has an easy-to-use editor similar to YouTube and allows you to export your transcripts. It also has a mobile app for on-the-fly transcribing.

1. Go to otter.ai and sign up for an account.

Sign up

Otter is where conversations live

2. Once you are all signed in, click "Import audio/video."

3. Drag and drop your audio file into the box provided to start the upload. Click "Done" when the upload is finished.

4. Refresh the page every once in a while, as you wait for the audio file to finish processing. When it is ready, click on it.

The screenshot shows a user interface with two main sections. The top section is titled 'Agenda Today' and contains a text box with the message 'To see your agenda [connect your calendar](#)'. To the right of this section are two buttons: 'Record' and 'Import'. Below this is the 'Recent Activity' section, which lists two items. The first item, 'Two Nations, One Land is ready', is highlighted with a red rectangular box. The second item is partially visible and reads 'Biosphere Int...'. To the right of the 'Recent Activity' section is a notification card titled 'NOTIFICATION Scheduled Downtime'. The notification text states: 'Otter is scheduled for maintenance Oct 3rd, 6-8 AM UTC. The service will be...'

5. To edit your transcript, click “Edit” in the top right corner, then click play at the bottom. It will play your audio and highlight the words as it comes to them. You can edit as needed from this screen.

The screenshot displays the transcript editing interface. At the top right, there is a blue 'Edit' button highlighted with a red box, along with a user icon and a menu icon. Below the title 'Two Nations, One Land', the date and time are 'Fri, 10/2 - 2:14 PM' and the duration is '1:24'. A 'SUMMARY KEYWORDS' section is present, showing a list of words in individual boxes: jason, sloane, alg, game, share, featured speaker, excited, called, arrive, philosophy, georgia southern university, teach, introduction, role, hold, nations, jay, email address, month, joining.

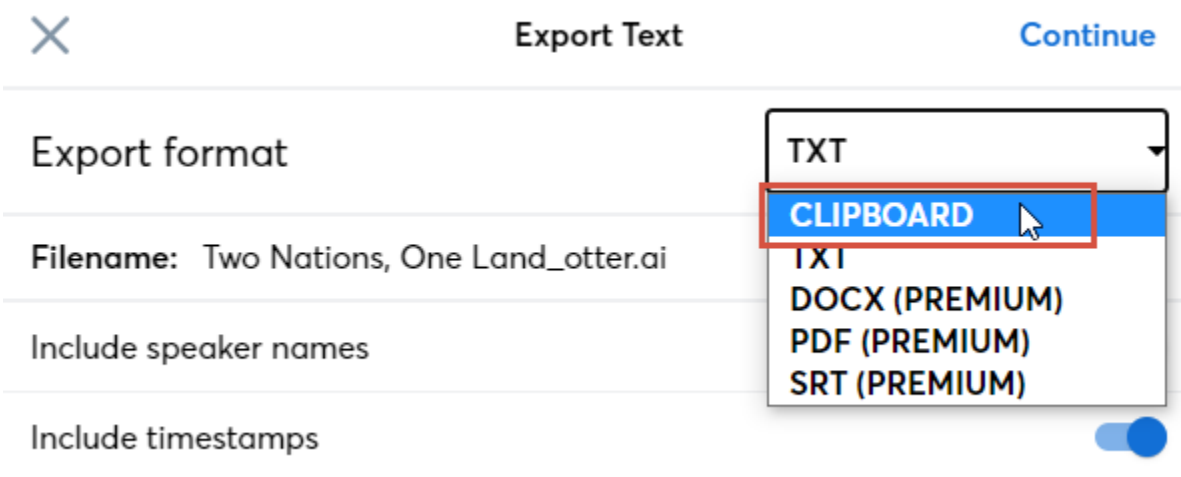

6. When you’re finished editing, click “Done.”

This screenshot is identical to the previous one, showing the transcript editing interface for 'Two Nations, One Land'. The only difference is that the blue 'Done' button in the top right corner is now highlighted with a red box, indicating the final step in the editing process.

7. To export your transcripts, click the three dots in the top right corner, then click “Export Text.”

8. Under export format, change it to “CLIPBOARD.” This will allow you to paste the text into Word, since exporting directly to it is a premium feature.

9. Select your settings as desired, then click "Continue."

 **Export Text** [Continue](#)

Export format TXT 

Filename: Two Nations, One Land_otter.ai .txt

Include speaker names

Include timestamps

Merge same-speaker segments

Export as monologue

10. The text will be copied to your clipboard. You can now open up Microsoft Word and past the transcript into a document, then save it as desired.
